🐙 https://github.com/cibilex   ◑ᵢ https://medium.com/@cibilex   📍 Turkey(open to relocation)

I'm a **full stack developer** with **four years of experience**, specializing in creating **innovative solutions**. As a **collaborative team player**, I excel at coordinating with colleagues to achieve **shared goals** and fostering a **positive work environment**. I have a solid foundation in **modern technologies** and consistently stay current with **industry trends**. I also share my **insights and experiences** on platforms like **Medium**. I'm **highly adaptable**, thrive in **dynamic environments**, and am **open to relocating** for the right opportunity.

🧠 Skills

Frontend Development:
- HTML, CSS, SASS, JavaScript, TypeScript
- **Vue**: Vue Router, Pinia, Vuex, Nuxt, Nitro, PrimeVue, Quasar, Vuetify
- **React**: Zustand, Redux, TanStack (Query, Router, Form, Start), react-hook-form, Shadcn UI, MUI
- UnoCSS, TailwindCSS, Bootstrap,motion
- Figma, Canva, google-maps, Highcharts, ApexCharts, Swiper

Testing and Tools:
- Jest
- Docker, Git, GitHub,AWS
- Firebase
- CI/CD Pipelines (Git hooks, GitHub Actions)

Backend Development:
- Node.js, NestJS, Fastify, Express
- WebSockets
- RabbitMQ
- Mongoose, TypeORM, Knex, Drizzle
- GraphQL
- Microservices

Database Management:
- SQL (PostgreSQL, MariaDB)
- MongoDB
- Redis

💼 Professional Experience

Frontend Developer, *Spexco* (*Vue,Pinia,Tailwind,Bootstrap,SASS,google-maps,WebSockets...*) ⧉   02/2022 – 06/2022
I skillfully crafted exclusive designs using Vue 3 and Tailwind, while also implementing various technologies like   Ankara, Turkey
Google Maps and Websockets for enhanced functionality.

Full Stack Developer,   06/2022 – 06/2024
ShipEntegra,PrinWork (*TypeScript,Vue 3,Tailwind,NodeJS,SQL,NoSQL,NestJS,Fastify,Express,Microservices...*) ⧉   İstanbul, Turkey
- Transitioned to a full-stack role within six months, developing high-performance backend services using **NestJS** and **Fastify** for both Prinwork and ShipEntegra.
- Led the conversion of legacy user interfaces from **Bootstrap** to **Tailwind CSS**, delivering modern, responsive designs with a dark mode, which significantly improved user experience.
- Designed and implemented a granular authorization system, enabling the creation of sub-users with specific permissions.
- Collaborated on the integration of major e-commerce platforms (e.g., **Etsy, AliExpress, Wix**) and payment gateways (**Payoneer, Stripe**).

Full Stack Developer, *N2Mobil Tracking Systems* (*,Vue,PrimveVue,Vuetify,Pinia,ApexCharts,Vue-dndrop*) ⧉   07/2024 – 10/2024
- Developed user-friendly dashboards using Vue UI libraries (PrimeVue, Vuetify) and charting tools like   Ankara, Türkiye
  ApexCharts.
- Built a Jira-style task management app with drag-and-drop functionality using Vue-dndrop for efficient project tracking.
- Delivered two projects on time, focusing on data visualization and task management systems.
- Enhanced UX through iterative design improvements based on direct user feedback.

Full Stack Developer, *Elegant Trading E-Ticaret* (*TypeScript, React, Zustand, Microservices, NodeJS...*) ⧉   01/2025 – 15/2026
- **Solely responsible** for the **Transport Management System** for **The Elitklinik**, managing the **entire**   İstanbul, Turkey
  project lifecycle from **system design** to **user and stakeholder meetings**.
- Following the transport project, **contributed to multiple clinic-side projects**, supporting **shared components**, **feature development**, and **system enhancements**.
- Implemented a **custom notification and approval flow system** to enhance **inter-department coordination**.
- Built **advanced web dashboards** featuring **Excel-like tables** with **multi-operation support** to handle **complex operational data** efficiently.
- Gained practical experience working with **microservices architecture** and **CI/CD workflows**.

📁 Projects

Portfolio, *Tanstack Start, Tailwind, Motion* ⧉   2025
Developed a **modern portfolio website** using TanStack Start, focusing on **high performance**, **responsive UI**, and **animated user interactions**.

xFormBot, *Vue,Quasar,Express,Firebase,telegraf* ⧉   2022
I always wanted to create a bot for Telegram, and with Telegraf, I easily fulfilled this aspiration by developing a Telegram bot. This bot serves to help users create, answer, and publish forms directly on the platform. Additionally, users can conveniently view their forms on the website.

vote cryptocurrencies, *Vue,Quasar,Vuex,MongoDB,Nodejs,Express,JWT*   2023
This project provides a system where we can vote for cryptocurrencies under 4 different strategies.Each strategy has a time frame to clear its votes, ensuring that the table of cryptocurrencies is always up to date. I integrated new login-register options for Google, Facebook, and LinkedIn, marking my first venture into such integrations. Moreover, I utilized the Vue UI kit with Quasar to enhance the user interface and overall user experience.

Snake game, *Javascript canvas API,typescript,vue* ⧉   2023
It's his first game experience.It's a classic snake game.He made it with javascript canvas API.

ShipEntegra, *Vue,Fastify,SQL,NoSQL,Redis,Tailwind,Figma* ⧉
ShipEntegra; It is the only technology-oriented turkish logistics company that carries out its software and operational processes within its own structure.

PrinWork, *Vue,Pinia,Tailwind,NestJS,Fastify,SQL,NoSQL,Redis,Figma,WebSockets,Firebase* ⧉
Prinwork is a platform where e-export-oriented manufacturers and e-export sellers who send their products all over the world meet.

📑 Certificates

AWS Certified Cloud Practitioner ⧉
Completed the official AWS Cloud Practitioner certification, covering core AWS services, cloud concepts, security and compliance, pricing models, and the shared responsibility model. Provides a solid foundation for working with AWS-based cloud systems.

Vue JS 3: The Composition API (Udemy) ⧉
I practiced the fundamentals of Vue.js, routing with Vue Router, managing asynchronous tasks with Vue Suspense, implementing authentication, and testing Vue applications.

PostgreSQL Database Administration (Udemy) ⧉
This course provided me with a solid understanding of PostgreSQL architecture, configuration, and role systems to improve database security and efficiency. I gained valuable experience in setting up backups, restoring data, maintaining databases using vacuuming, and optimizing query performance. I also explored the new features introduced in PostgreSQL versions 14, 15, and 16, enhancing my ability to manage databases effectively.

Modern Web Development Course (Udemy) ⧉
Completed an in-depth course covering foundational web technologies, including HTML, CSS, JavaScript, and Bootstrap, with hands-on project development. Advanced to backend development with Node.js and MongoDB, gaining practical experience in building full-stack applications. Explored popular frameworks like Angular, React, and Vue, applying them in various projects. This course played a key role in helping me secure my first job in web development.

TypeScript 5 for Developers ⧉
Completed the 'TypeScript 5 for Developers' course, which provided a comprehensive understanding of TypeScript fundamentals and its latest features. The course also included hands-on projects demonstrating real-world applications with React and Express, enhancing both frontend and backend development skills.

React 18 Course 2025 ⧉
Completed an in-depth React 18 course, mastering advanced concepts such as useReducer, Context API, React Router, and building complex, high-performance user interfaces with hands-on projects.
